Comments: It is very disappointing that the first service is unable to come up with a better option than decommissioning roads because they can't cut like they'd want to and because of litigation from small groups like Bark. As a frequent forest visitor I would expect the FS would've learned from the Box 36 fire that essentially closed the paved 45 road forever. Why can't the FS post signs like they have already about traveling and entering at your own risk. I would like to know which roads will be getting the ax because I may have to lawyer up as well. This is beyond ridiculous and I'm sad that y'all can't travel down to the Molalla and take some notes from the BLM. Reducing accessing is beyond what your goal is. I will definitely follow up this with a call. What will happen when it burns again? More shutdowns? More closures? Give me a break. Let the locals run this if you are unable or uninterested in doing so. It almost seems like y'all want us to leave what we fund. No, no we won't leave. We will rally if we need to.
