Comments: I am writing to you to express my concern for moving forward with the abandoned well head and mine project. While the idea of addressing these sites is commendable, I am afraid that there has not been a thorough environmental assessment conducted to determine the full impact of this project. We as the public do not know how many sites there are, where they are located, and what the impacts will be on wildlife, forest health, and watersheds, as well as surrounding human communities. Will greenhouse gases be emitted and, if so, how much? Please stop this project until a thorough examination of these factors is conducted and allow more time for public comment.
