Title:

Comments: For the Sweet Home Ranger District I request stewardship that responds to our unprecedented planetary climate crisis. PLEASE CHOOSE "alternative 4" in the draft Environmental Assessment, focusing logging efforts in the Quartzville-Middle Santiam timber sale on primarily thinning previously logged, younger forests and eliminate logging old growth stands as these are essential to provide some of the highest carbon sequestration on the planet. Old trees are able to store carbon for 800 years or more! Please protect these trees. I've seen logging trucks on the highway this morning of massive old growth headed south on I 5. Please save my future.
