Comments: As a long time Estacada resident and an avid user of the Clackamas district. It is unacceptable to me that the Clackamas area is still closed entering 2022 . I understand the severity of the fire and damage ( I live here ) I just can't understand how the USFS Has not accomplished any hazard tree removal on the forest roads thus far. ODOT has been working on 224 since shortly after the fire why was work on the forest roads not going on simultaneously? I am in support of the hazard tree removal project. I just wish it hadn't taken this long to start talking about it.
