Title:

Comments: I would urge that you carefully examine the motorized vehicle section of the trails. As ranchers, we are having more and more difficulty with motorized vehicles traveling it excessive speeds, chasing cattle and sometimes damaging property. Others do not stay on trails and demonstrate no courtesy or respect towards the animals, especially horses and dogs. These incidents are caused by a small minority of those using the trails but they cause much stress and damage to the animals along with much damage to the trails and the terrain.
