Dear Frank Aebly,

The Mendocino National Forest continues to push for broad post-fire logging across hundreds and thousands of acres throughout multiple watersheds.

The intense soil disturbance from heavy machinery on these sensitive soils increases the spread of invasive plant species across the forest. Please do not worsen this threat to native ecosystems and consider the cumulative impacts.

I am opposed to the use of herbicides. They are harmful to people, plants, insects, animals and soil. Controlling invasive species can be accomplished through safe and effective non-toxic alternatives.

I support Alternative 4 and the reduced logging of Alternative 5.

Sincerely,

F Hammer

1490 Chestnut St

San Francisco, CA 94123
