First name: Seth

Last name: Benge

Organization:

Title:

Comments: It would be very advantageous for first responders and other emergency personnel to have cell phone coverage in this area. This would allow for much improved communication between responders and improved response to a number of emergencies. Though I cannot speak officially for any organization, as a member of Central Washington Mountain Rescue and as a Spill Responder for the Ecology Hazmat team, I think this would be a big help in emergency response operations.
