Comments: I support the proposed trail from Redstone to McClure Pass. I think it could be a tremendous community benefit. I have recreated in this area many times as cyclist, on HWY 133 (which can be terrifying at times due to traffic) and as a hunter. When I have hunted this area, I was always amazed by the old roadway. Utilizing the old roadway seems like a low-impact platform to facilitate trail construction. As a hunter I'm also sensitive to wildlife impacts caused by outdoor recreation and development. In light of this concern, I think consideration should be given to 1. Trail closures during winter months. 2. Trail closures around deer and elk calving times. 3. No dogs. Thank you.
