Comments: I appreciate and use all of the trails designated on the maps. Being able to get outdoors is important for physical and mental health. I also appreciate that the area has limited access to tours - a place locals can go when the rest of the island is over-whelmed with visitors.

First, road maintenance/access during the winter months! PLEASE include funding for de-icing, snow plowing.

Trails to connect existing trails creating more circular options would be wonderful. (Ex: Add a connecting trail from the Perseverance trail to the Connell Lake trail? I do not know all the obstacles, but it would be a great option.

As you know, many areas of the Ward Lake trail flood with heavy rains/high tides. Perhaps reroute or add bridges so the trail is still functional.

Thank you for providing platforms for input.
