Comments: Thank you for your work -- for your acceptance of, and commitment to, cogent, useful environmental analyses in that work.

I think "danger tree removal" is not a good idea for roads that're closed or decommissioned (or have previously been marked for closure or decommissioning). Also, the rivers in this "wild and scenic" area are crucial; they must be protected, just like all the species who live in/along them. Finally, working closely with -- and respecting the history/knowledge of -- local tribes is a crucial commitment for all government agencies.

We need you to acknowledge -- and attend to -- these things as you work.
