Comments: I hope additional commercial tour groups are not permitted.

Please repair the many issues that need to be addressed before beginning any new projects. The Perseverance and Carlanna trails are especially in need of much repair. Carlanna has extensive water damage. In particular is the creek crossing a bit past the big bridge where stepping stones were flooded away last year. Just a couple flat stones would be a big help. There is also a slide area not far below the alpine where footholds have been placed, but if any additional fixes could be added there, that would be great.

Lastly, it is discouraging that a tour operator was allowed on Carlanna. At the very least, could he be requested to use street parking, as the parking lot at the trailhead can get very full in summer.

Thank you for considering these issues.
