Title:

Comments: This will provide a much needed cellular service to this area for public safety and first responders. The fires in the area that last several years could have been reported sooner by road traffic on Hwy 12 if cellular coverage was available. Perhaps the fire could have been contained earlier instead of destroying several thousand acres. Environmentalists and naturalists should be able to give up a 80 foot by 80 foot area to help preserve fire from spreading several thousands of acres and destroying wildlife across these damaged areas in the future.
