Comments: I feel that the river rafting community has been patiently waiting for access to the Clackamas river above North Fork reservoir to open. I feel ODOT and the Forest Service does not completely understand the impact this closure has on the recreation in the Portland Metro area. I also feel that ODOT should look at opening sections of the road rather than just trying to get it all ready at once. For example, opening the section from Promontory to Moore Creek, then Moore Creek to Three Linx, then Three Linx to the ranger station. In this way recreation can happen again in stages.
