First name: Kima

Last name: Garrison

Organization: Portland Books to Prisoners

Title:

Comments: * Danger tree removal would not make sense on roads that are currently closed or decommissioned, have previous decisions to be closed or decommissioned, or on roads identified in the analysis for future closure or decommissioning

* In terms of "striking distance", the proposal regarding tree-heights will likely be based on site specific circumstances. This is a good way to move forward as long as those circumstances are discussed in the analysis with Project Design Criteria.

AND no more grazing/mining rights on public lands! Sincerely, Kima Garrison
