Comments: Regarding the continued closure of the 224 hwy and the Only access to the Wild and Scenic Upper Clackamas River. Serious action is needed to attempt to provide public access to the river again. Whether that's temporary limited hour access through the gate following a pilot car or something similar. So many people, businesses, outfitters, families has suffered from this closure. This is one of the closest and best whitewater runs around. Ask the estacada how the closure of the road has affected regular traffic and tourism through the area, not just seasonally but all year long from paddlers, fishermen, hikers, ect. We deserve access to our home river.. not open ended answers and excuses and lack of information about what is being done.
