Title:

Comments: The plan looks great, will be a good new amenity without any problematic impacts except to the current small population of local users. Because, if you build it, they will come. And they will come in droves. Plan on doubling the parking areas.

My angst: Do we really need to create another place for people to drive their cars from Aspen and go for a short mountain bike ride? Are you really going to be able to keep e-bikes off the trail south of Hayes Falls?

As a road cyclist, I'm happy to see wider shoulder on 133 is part of the plan; wish that could continue through the canyons towards the Marble turnoff. Perhaps, AT LEAST, a prominent Share The Road sign could be installed on the highway? Do what you can, please.
