Title:

Comments: I vehemently oppose this trail. Bikers have a myriad of other options, if you don't feel safe on 133, bike somewhere else. Another PitCO project seeking what's best for humans, not wildlife or wilderness.

The EA study that stated, "the animals might be better off with a formal trail." is absurd. They are WILD animals, they are better off without any human interference and infrastructure.

Humans are humans, and we are filthy. Trash, waste, dog poop, etc that will be left along the trail will find its way into the water. Don't believe me? Check out the Rio Grand Trail and Redhill- both disgusting. The next debate will be over E-bikes on the trail. Building it will only become a long term fight and desecrate the beautiful Crystal Valley.
