Title:

Comments: Greetings,

I support the proposed trail (largely on Forest Service land) from Redstone to the top of McClure Pass for the following reasons:

Largely built on existing trail

Enhances WSR for Crystal (especially recreational)

Gives a chance to get away from the highway without creating totally new trail

Would actually protect wildlife if Forest Service imposes seasonal closures

Works well as a stand-alone path or if the entire trail system is built

Has been thoroughly planned and studied

With gravel base will leave area largely undisturbed

Thanks,

Peter Westcott
