Comments: To whom it may concern, it is my belief that we already have enough wilderness land set aside. Any more additional acreage would be nothing more than confiscation of land that we the people have either improved upon or enjoyed with motorized recreation with little disturbance to land that a few of us actually get up to. 2(b)(1) Alternative D is the only and best alternative out of the options presented to not have an adverse effect on our local economy. Adding additional acreage to the already wilderness could have major effect on non-wilderness land in the event of a fire started on wilderness ending up destroying non wilderness land that it may border. 2(b)(1) Alternative D is the only proposal that would improve access to the public land trail system and better protect Non wilderness land from impromptu trail making. again, if a plan revision is needed, I would support 2(b)(1) Alternative D. Thank You.
