Comments: Good Day,

Thank you for the opportunity to comment on this project. I support the proposed 7-mile trail as described in the Proposed Action. I like that most of the trail will be on previous transportation routes and that there will be seasonal closures for wildlife. I suggest that further work be done to develop parking areas and toilets for trail users, one in Redstone, one at the top of McClure Pass and another maybe near the Marble intersection. If and when further trails segments are analysed, it will be critical to look at cumulative impacts. Overall, though, I think this trail will be a useful community amenity and will also address current and future impacts of recreationists in the area.
