Comments: I have to oppose this project for the simple reason that the cons outweigh the pros. Let's put the pros as safety and enjoyment. The cons are cost (build and maintenance. Let's pay our teachers more!), lack of parking and bathroom facilities, wildlife impact, safety concerns, trash, human and dog waste, toilet paper, dog poop bags and dogs not on leashes (already an issue on most of our trails), lack of trail etiquette, private property concerns, etc. It seems pretty common sense to me to vote a big NO. This valley is already developed enough. What makes this valley so special is the historic preservation and scarcity of development . These issues have been going on in Marble and we have to put ourselves in the shoes of the people affected directly and daily by these issues. We need to put our selfish desires aside and look at the issue with common sense and practicality.
