Title:

Comments: I support the objection of a bike trail from Redstone to McClure Pass as stated by the Roaring Fork Group of the Sierra Club. The research of this group, along with my own observations as a 50 year resident of the Roaring Fork Valley, support a dismissal of this proposed trail. It will disturb sensitive wildlife areas as documented by government wildlife managers. We must put a STOP to continued development interference to preserve wildlife habitat and environmental concerns. Please do not approve this project just to add more recreational opportunities. All new projects approved in the Roaring Fork Valley must be for only necessary use. "We have a God given duty to protect the animals who have no voice."
