Comments: This is a very bad idea with profound effects on our wildlife. I have lived in Elk Run in Basalt for over 30 years we should change our name to NO Elk Run. Herds of elk would winter at Guido Meyers tree farm . Guido explained Ever since they put in the Albany trail the elk have never came back. People with or without dogs are better then any fence.. While hunting this year I came across an elk biologist HE TOLD ME THE Elk have changed their migrating routs and no longer come up west Sopis creek. One more trail above Red stone and we can fence them all out .Between People, Mountain loins and wolves no wonder all the big elf herds are gone .May be we should listen to the elk biologist, DOW,NEPA, OR A LOCAL RANCHER
