Comments: This proposal would be amazing for the biking community as well as the drivers on 133! I would love to see this as new mode of transportation down 133. I refuse to ride my bike to Redstone or Marble because it is just too dangerous on the highway. I also find it scary when I come up on a biker while driving. It is far too dangerous to ride your bike on highway 133. The bike path would be a great way to bring much needed tourism to Redstone and Marble as well. It would also be a great alternative way to see the experience the Crystal River valley!
