Title:

Comments: Bicycling from Vancouver, Canada to San Francisco can be a nightmare with big trucks and big RVs passing going highway speeds especially when the shoulder available to ride on is measured in inches. Their air wake can throw you off balance if you are not careful and you're just thinking, 'I hope they don't accidentally swerve or lose control.

Make the trail, you will save lives.

Hwy 101 and 1 are epic.
