Comments: I am opposed to the Redstone/McClure Pass Bike path proposal. We have been residents in the Roaring Fork Valley for over 20 years. My understanding has been that the Forest Service has as its main objective to "PROTECT" the wildlife of our beautiful, natural protected Forests. I am shocked as to the length this proposed intrusion of natural habitats will go. Where are the CURRENT studies for impact? On what ridiculous basis has it been determined "NO long-term impact, only during the construction of the path" as referenced on the display boards? Reading the wording as "BENEFITS" made me feel sick and offended. Where is the discussion & proposal for dogs on leashes, E-Bikes, enforcement of gate closures & human & animal feces/waste? We know this to become an issue at many other protected forests. We are not ignorant people; in fact we care as you propose to, for animals, quality of life & the future
