First name: Edson

Last name: Harris

Organization:

Title:

Comments: The Forest Service needs to make decisions based on what is best for wildlife and not on the demands from the recreationists. We are losing more and more habitat to diversions that please our selfish demands and without considering the birds and other animals that need protection.

We can develop a bike path for those that want it by following the already disturbed corridor along 133 every bit of the way that is possible.
