Comments: Upon review of modification of table 12, Sheep Creek Vegetation Management. With limited dispersed camping sites off roads 5160 and 5175, I would like to see road 5160-030 keep open to ATV travel along with 5175-020. These roads make easy access to the trail systems. With primitive camping sites limited, We have used these roads to reach existing trail systems for decades. I have not seen the erosion that you speak of in this area, plus creeks are far from the road and there is plenty of vegetation to manage run-off. Also in past years we have not seen much wildlife in these disputed areas. My concerns would be appreciated in your final review of land use. This would be classified as a low use ATV area also.
