Comments: I am familiar with the Private/non-governmental piece of real estate being discussed in this land swap and I am in favor of this land exchange. I only wish the rest of the private property adjoining the private parcel in question were included in the exchange in some fashion. Any time we can get a small parcel of private property, which is surrounded by National Forest, to be included in the Forest, I believe it is a good thing. (pricing is of concern of course!!) I hope this land acquisition/land exchange can be completed.
