First name: Kylie

Last name: Skersic

Organization:

Title:

Comments: This was written by a special education student who is concerned by the logging of the spruce forest.

To whom it may concern,

Concerns:

- habitat loss
- warming climate
- endangered species
- habitat fragmentation
- Loss of genetic diversity in spruce forest
- Loss of species because of global warming
- food web disturbances
- Increased CO2 and less O2

I care a lot because there are animals that live there. Lots of tourists come to visit. The Black Hills have lots of trees and cutting them down would subtract oxygen from the atmosphere.

A concerned citizen,

Kylie
