Title:

Comments: Who will benefit by this sale? What will be loss be for non-human life and even for our future generations? I am opposed to any short term hasty sales of our public lands. As a long term Oregonian, the forests, and especially the old growth trees that are left, are of the utmost value for me. Consider what you are doing regarding this sale, the roads that will be constructed that will desecrate what wildness is left, consider more than the short term gain for some, but look at the bigger picture, and what this sale means for the rest of us who reside in this state.
