Comments: About ten acres of Forest Service land, next to the Crown park, is currently used for parking, (when sporting activities are held at the park). Where will these cars park if this land is sold to Eagle county for housing?

Hope the county that purchase this land will preserve enough land for open space. If, heaven forbid, we have another forest fire in the area, firefighters have open space they can use as a base for operations as they have in the past.

Respectfully submitted for the record
