Comments: Hi, my name is Zane Reeves. I have spent my whole life going up the the shaver area. From shaver all the way to Courtright. Over the years I have noticed that there is a lot of downed trees. From trees that have just fell over and are on the Forrest floor. As well as trees that have been piled up for years and years and never get moved or touched. My concern is if there was a another Forrest fire to come through but on the other side of Dinkey there is a lot of fuel for it to burn and not stop for a while. With that being said my comment/thought is the people who enjoy spending time up there and there is a lot should be able to cut up that wood with a chainsaw and take it home with them. Even if you charge them like \$50 I think people would gladly pay it. I feel as both people would be happy. You guys would be happy and we would too. I know there is something like that in place already I'm just not exactly sure what the rules are on it. Thank you for the read.
