Comments: Project NEPA,

Logging in the Black Hills anywhere, but especially in the National Forest, should NEVER be clear cut style.. that style is devastating to the land, vegetation & wildlife & totally unnecessary !

Our National Forests are there to preserve these elements for the ecosystem & the future of everyone.

Money & power play's dreamed up to benefit a few is NOT the American way for the majority's of our nation.

To be clear, I am against this & other plans on National Forest land.
