Comments: I am totally opposed to the Spruce Managment project. Why are we destroying these beautiful trees. I grew up in Colorado and in Colorado the Spruce (state tree) is so admired and protected, with the exception of necessary thinning to keep them healthy. Living south east of Hill City, I have witnessed these past two years what the forest services ideas of "thinning" trees is. The landscape here has been totally and perfectly damaged. Please put an end to this money making plan for the logging industry. You are destroying our beautiful hills.
