Title:

Comments: Please consider my few suggestions.

1. Please improve the water walkway along the lake from the campground to the big parking lot to the level that it will cover the tree roots and such so that wheel chairs and walkers and strollers can traverse this section. My spouse had ankle surgery a few years back and this was not possible to walk this section for her rehabilitation. It also forces folks with strollers onto the roadway which can become hazardous. The rest of the trail has been improved to an excellent level. Improving this last stretch would make the whole lake walkable for a large group of folks who cannot complete it currently and have to turn back, walk the road, or find another venue.
2. Please consider adding fencing rails such that is on the rain bird trail. This would make those sections with steep drops much safer for children, elderly, and physically challenged.
3. Netting or chain link on the sides of the bridge to make it less hazardous especially for young children. I have walked with my grandchildren and this is always a worrisome section to cross.
4. A rustic wood playground such as the one at Point Higgins school. This would blend in with the park and give children more play time options as others use the picnic grounds. Built with safety in mind for toddlers. Plus swings and slides.
5. Greater area improvements could be a connecting trail from Harriet Hunt Lake over to Lunch Creek Trail.
6. Beyond that Mountain bike trails from Ward Lake all the way to Harriet Hunt and beyond to Shelter Thank you!
