Comments: To whom it may concern,

I am writing in opposition to the current plan, as written, of letting the river take its natural course potentially at the cost of the 1900Rd, with no expectation or plan of repair should it do this. There are so many recreation opportunities, motorized being one of the major ones, that this plan would drastically hurt, causing a huge economic impact to the surrounding area, if this plan were to come to fruition.

Please, find a way to keep the 1900Rd open for all types of recreation.

Thank you,

Kevin Vanderhorst
