Title:
Comments: I appreciate the opportunity to comment on Creek Fire Restoration Project #60422. I am the Fresno County Supervisor who represents the area where the Creek Fire originated on September 4, 2020. The fire devastated much of eastern Fresno and Madera County and deserves attention in restoration.

My impression of this document is that it is too narrow in scope. I would recommend the following additions to the project:

*Broader scope of restoration to include wilderness areas
*Preservation and maintenance of all general and OHV roads within the burn scar
*Maintenance instead of decommissioning of roads constructed for restoration efforts
*Detailed long-term maintenance plan as post-project objective
*Expansion of project to include re-opening of previously closed OHV roads and campsites to function as fuel breaks, firefighter access routes, and firefighter staging areas for long-term maintenance objectives
*Expansion of project to include fuel reduction in unburned areas of Sierra National Forest

I appreciate your work very much and look forward to Project #60422 being implemented with these additions.
