Title: Sr. Environmental Scientist Supervisor

Comments: This comment is related to Cottonwood Creek.

Cottonwood Creek has ESA/CESA endangered Paiute Cutthroat Trout in it (<https://wildlife.ca.gov/Drought/Projects/Cottonwood-Creek>), and we need to make sure that the plan updates and prioritizes monitoring and management in this area. Specifically:

*We want to allow for continued gravel augmentation to facilitate successful spawns; if necessary based on population trends.

*We want to allow for riparian management, including fuel control in the riparian understory. This may include infrequent grazing or manual removal via timber crews.

*We want to make sure the area is monitored for illegal cannabis grows - we had one in the watershed in 2015.

Thank you,

Russell
