Comments: I am contacting you to advocate for ecologically driven land management on Mt. Hood National Forest and to address my concerns with the Grasshopper Project.

I disagree with any portion of this project that would result in long term detrimental effects to Northern Spotted Owl.

I'm asking you to consider Mt. Hood National Forest's contribution to carbon conservation at the forest level and the project level.

Thank you for the opportunity to comment on the Grasshopper Project. I am hopeful that you continue to include meaningful public engagement on this project.
