First name: Joe

Last name: Puentes

Organization: Sierra Pacific Industries

Title: Division Forester

Comments: I am in support of this project to reduce fuel loading for future fire management and timber stand regeneration. Timely salvage logging is the best tool to accomplish this. However, I would rather see proactive forest management used to reduce the impact from wildfire and prevent the current situation from developing in the first place. This would include reducing fuel loads through logging, chipping, mastication, and the use of prescribed fire.
