Comments: As a Member of the West Virginia Deer Association I want to strongly support the efforts of timber management on our National Forest Lands in the Cheat River District and all other areas of need throughout the State of West Virginia. I understand the need to harvest the older age timber for proper land management and this goes hand in hand with wildlife management. This greatly improves all wildlife habitat while providing great new growth cover for large and small game as well as opening up the canopy for young fresh growth that gives great nutrition opportunities for our WV wildlife.

Thank You in Advance for your efforts,

Jake Phillips
