Comments: I have taken numerous family and friends summer trips to the Crested Butte area. Most of these trips are focused on outdoor activities which is mainly mountain biking. I completely agree with the proposed projects due to safety and maintenance reasons. Trail usage has increased causing several issues and trail conditions to decline. I also encourage projects that support building and maintaining trails for all skill levels. My daughters like to mountain bike but are not at the skill level to ride the majority of trails in the area.

Crested Butte is a special place to visit but does need the support to maintain and improve the trail system. We would be more likely to continue to spend our travel related funds in Crested Butte with the approval of projects like this. Thank you.
