Title:

Comments: Please do not modify the areas already open. You will increase hostility and problems within the snowmobiling community as it appears Cross Country Skiers seemingly have a personal vendetta against us for no reason. We have no desire to be around them as they do to us. I respectfully slow down and go way around them. Our Area has had locations already closed multiple times in the past and has limited riding to an already strained location. This has caused the community who are wholeheartedly all great people to be let down time and time again by USFS. Our OHV stickers pay for the trails to be groomed so why are we getting access shut down when we provide funding to the Forest Service Agencies??? This is completely against open public land and will only cause further problems if it keeps shutting down access for no apparent real reason as Snowmobiles do not leave any lasting effects whatsoever after the snow melts. Keep the areas open! Do not limit Access! This is public land and it should remain that way regardless of what anyone bribing or threatening legal action towards USFS says.
