Comments: CBMBA's disappointment in the Forest Service's lack of transparency in their decision process on the North Valley single track trail expansion plan echos throughout the 7 valleys. For decades CBMBA has dedicated themselves to building trails that benefit all that live, work , and play here CBMVA has an amazing reputation. They have gone above and beyond to work with the Forest Service as well as ranchers and private landowners as they build trails to the benefit of our entire community. For the Forest Service to simply scrap trails that will keep people safer, without public comment and opinions, I am left dumbfounded. Give us the chance to see their proposed trails and ideas. ALL of the trails and trailheads they originally proposed.
