Comments: Thank you for your efforts on the North Valley Trails Project. Much appreciated. Please reconsider the work that the LOCAL people who live and use these trails are suggesting to help connect many of the existing trails, improve safety by getting riders off roads that cars use... 1) Please include these two trails: Upper Cement Creek to Crystal and Dr. Park Reroute to allow for public comment. 2) Please do not leave out the Snodgrass Public Trail - currently the Snodgrass Trail goes through the Allen Ranch private land and due to their cattle grazing is only open approx. 60 days per year. We need an alternative on public land. 3) The Eccher Gulch #559/Granite Basin #558 trails should not be left out. 4) Deer Creek to Tent City - a portion of this trail was removed - please reconsider so that people can get off the road (any biking experience on a road during July and August is DUST CITY when cars continuously stream by... safety and enjoyment of the wilderness are key). Thank you! Chris.
