Comments: For a premier mountain biking destination that the Gunnison Valley is promoted as being, the NVT proposed action details are embarrassing. Only 3 projects >0.6 miles long, and those are all simply road-adjacent alternatives to routes that already exist? The other projects outlined are needed but are tiny in length and scope. What has been proposed here is pathetic compared to other mountain bike destinations in the world that actually support building real trails the users want to ride/hike. Where is a Snodgrass DH-only trail? Where are any black diamond downhill trails that are not lift accessed? Stop kowtowing to hunters and ranchers, start getting real trails built.
