Title:

Comments: to add a second letter, What will be gained by expanding Tent City. Where will that end and how can you keep expanding it? There needs to be a limit to this. Will Tent City be expanded across the Middle Brush road?

Why develop a second trail down the hill from the West Brush road? Use the existing road and quite ruining ground just because the wheeling people want a rush? Horse and hiking people need places to go to enjoy the outdoors without being

constantly disturbed by bikes. Bikes by the way do not yield to foot travel because they cant look up long enough to see ahead of them. I never trust a biker to move for me. This situation needs to be brought to the attention of the biking world in general. Horses also prefer people speak before they come up behind them. If they don't know you are there, they are prey and that puts the rider in danger. SPEAK!!!!!!!

The Strand Bonus is not necessary and folks are interfering with cattle in the area. This is multiple use, not just for wheels.

Please consider these points before you make the final decision.
