Comments: I am a property owner adjacent to this project and have many concerns regarding the development of this land. My children and I have greatly enjoyed hiking in this specific area. There is even a discovery trail of sorts with hidden numbered trees that we have enjoyed the challenge of finding each number and in numerical order, as well as the foundation of an older falling down cabin that the kids love to explore and imagine. This is the only area within a short walking distance of these properties for such exploring. That is part of the National Forest experience for ourselves and our guests. Also, it provides the sheltered seclusion that is so prized by our owners and guests. The aesthetic value and possibly monetary value of our properties would be significantly negatively impacted by such a development, and I ask that this land exchanges NOT occur for these and many other reasons.
