Comments: I believe that educating the visiting public about climate change should be the number one goal at the MGRA, and that the proposed changes should follow from that goal. We have in the MGRA a perfect teaching tool. Here are my recommendations:

YES to more trails. The Lakeshore Trail should be wide enough for grooming to accommodate the huge number of skiers in Juneau. I prefer Alternative 3, slightly in from the lake with small side trails out.

YES to a bridge to the campground and cabins there.

YES to West Glacier spur trail upgrades and loop - but

NO to all motorized boat traffic

NO to remote area expansion

NO to a cafe in the welcome center. You've been training us for years not to bring food to the area. Also, welcome center should be about the size of the pavilion. A small suggestion for welcome center - invite locals to submit family photos over the past 40-50 years to create a display to emphasize how fast the Glacier is disappearing. Linking to human faces might have a different impact.

This was not in the plan, but I support timed entry of buses to the area.

Thank you for your responsiveness to local concerns.
